

# Site visits

16 April/17 April 2026

**CLIMIT**

  
GASSNOVA

# Site visits (Oppportunity 1 and 2)

16 April/17 April

**Brevik CCS** (Cement plant)

**Bus 1:** 07:45-10:30

Bus on «site» 08:30-09:30

**Buss 2:** 08:45-11:00

Bus on «site» 09:30-10:30

Summit participants

Bus from hotel in Sandefjord 08:30 (approx. 50 min. drive)  
– Site visit (1.2 hour) – Bus to Porsgrunn train station (approx. 30 min. drive)  
and than train to Sandefjord Airport Torp or Oslo Airport Gardermoen  
(suggestion the 11:17 train)

**Oslo CCS** (WtE)

08:30-12:30

On «site» 10:30-12:00

Summit participants (max 25 pers.)

Bus from hotel in Sandefjord 08:30 (approx. 2 hours drive)  
– Site visit (1.5 hour) – Bus to Oslo Central station (approx. 30 min. drive)  
and than train to Oslo Airport Gardermoen

**Brevik CCS** – World's first CO<sub>2</sub>-capture facility in the cement industry  
Brevik CCS is Heidelberg Materials' most advanced CCS project. Brevik CCS is part of the Norwegian government's Longship programme, which aims to demonstrate the capture, transport and safe storage of CO<sub>2</sub> from industrial sources.

[brevikccs.com/en](https://brevikccs.com/en)

**Oslo CCS** plans to capture up to 350 000 tonnes of CO<sub>2</sub> from their waste-to-energy in Oslo.

At Hafslund Celsio residual waste that cannot be recycled is burned. So, the recovered heat produces heat to the residential customers and electricity. Capturing the carbon that is emitted during this process contribute to solve the climate problem associated with Waste-to-Energy activities.

# Site visits (Oppportunity 3 and 4)

16 April/17 April

## Northern Lights (CO<sub>2</sub> Hub)

08:30-13:00

Summit participants

On «site» 10:00-11:30

Taxi/Bus from Bergen Bus station (approx. 1,3 hours drive)  
– Northern Lights (1.5 hours) – Bergen Airport (approx. 1,3 hours drive)  
Lunch is served on the bus on the way back.

## Technology Centre Mongstad (TCM)

08:30-13:00

Summit participants

On «site» 10:00-11:30

Taxi/Bus from Bergen Bus station (approx. 1,3 hours drive) – TCM (1.5 hours) –  
Bergen Airport (approx. 1,3 hours drive)  
Lunch is served on the bus on the way back.

Delivering CO<sub>2</sub> transport and storage as a service, **Northern Lights** enables mitigation of industrial emissions that cannot be avoided and accelerates the decarbonisation of European industry. Once the CO<sub>2</sub> is captured from its source, it will be liquefied and transported by custom designed ships, injected and permanently stored 2,600 metres below the seabed of the North Sea.

[norlights.com](https://norlights.com)

**Technology Centre Mongstad (TCM)** is advancing carbon capture for a cleaner and greener future. By bridging the gap between technology developers, science and industrial application of CO<sub>2</sub> technologies. The main objective of TCM is to test, verify and demonstrate different technologies related to cost-efficient and industrial scale CO<sub>2</sub> capture. Moreover, we provide advisory services to carbon capture projects. Our goal is to facilitate the advancement of carbon capture technology for mass deployment across industries. We are an important part of Norway's contribution to mitigate climate change.
